ABOUT US

GLANZA is a leading bathroom brass ware brand providing high quality taps, showers, accessories and fittings to customers across the country.

GLANZA belongs to manufacturers of bathroom fittings known for quality and elegance. The far sighted vision of management raised the company to new heights in a very short span of its operation.

At GLANZA faucets are supplied with reliable and carefully through-out solutions, so you don't have to suffer for the sake of beauty. Evolving with changing life styles of people and understanding their need. GLANZA envisioned a whole new world of bathroom fittings and accessories.

Our products have been designed to withstand daily use, year after year, without problems. All new designs are fully tested using prototype models and operational performance is checked under extreme conditions. So all our models get a rough start in life. But we are not content with less, because without stability, the good life fades away like morning dew.

Our goal is just to be simple and ambitious.

We want to give you a better life with water.

We want to do more than just make taps. We make fittings for your well-being - for life, for you.

Star Plating Finish: Known as one of the best surface finished in the world. The results is a lustrous, mirror-like sheen that is soil repellent, scratch resistant and non-tarnishing. It ensures a color-fast, good as new appearance for years to come.

It is given the finishing touch by a perfect water stream. This is guaranteed by the model, from a market leader.

It lasts a lifetime:
The ceramic mixing cartridge of our has undergone testing for 5,00,000 usage cycles.

Doesn't twist out of shape, doesn't burst, and is always hygienic. The pressure resistant, torsion safe

Tap Design

It's not only offer superior form and function, and also designed with sustainability in mind. We believe that luxury should do more than simply look good, it should do good. And that true luxury has more than just style, technology and craftsmanship - it has a conscience.

Brass Trim Plate: Constructed of brass material, ensuring durability and providing aesthetic appeal.

Multi Choice Valve :
Once the Multi Choice rough is installed, future shower function upgrades or style changes can easily be made without altering the plumbing behind the wall.

Ceramic disc cartridge:
A lifetime of maintenance - free operation, offers a smooth feel and reliable operation. It surpasses conventional durability standards to withstand the toughest conditions, including hard water.

Brass Handle: Ergonomic lever design for ease of use. Combines the strength of simple, architectural forms with sensual design lines.

FAUCET MANUFACTURING PROCESS

CASTING

The Start of a Glanza Swing Faucet: Currently still a raw and inconspicuous brass bar, the raw material melts in the furnace at over 1000 degree centigrade, the liquid metal now takes on a recognizable form. All these were done by Italy IMR Glanza Casting Machine.

MACHINING

The faucet goes to Machining process. This is computer controlled process. Our cutting-edge machine and experienced workers ensures the gravity casting body has all it's surfaces finished to a high degree of smoothness.

POLISHING

The faucet enters the polishing stage: The rough casting is polished by hand, to ensure that the surface has an impressive shine, all flat surfaces and edges are polished manually. Automatic polishing machine is also used to increase the production capacity.

ASSEMBLING

A single Swing faucet comprises almost 30 individual components. In the final assembly, the specialized workers assemble all parts together. No product leaves the factory without first being tested for leaks and optimum spray performance.

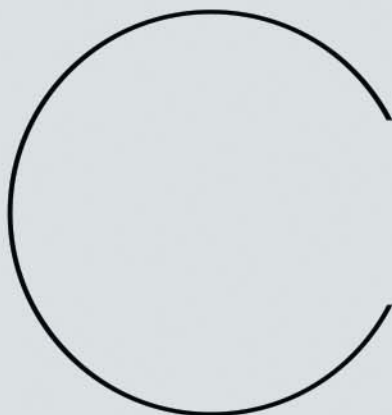

PLATING

The brass faucet are placed in an electrolytic immersion bath. In one of the most modern plating systems, the faucet now receives a brilliantly shiny chrome layer that ensures long lasting durability. It bathes in several electrolytic baths for up to an hour.

All products carry 10 years warranty against any manufacturing defects.

TEFLON TAPE

GLANZA®
BATH FITTING & MORE

P.T.F.E. THREAD (POLYTETRAFLUOROETHYLENE)

WHY GLANZA SEAL TAPE USE

Thread seal tape is appropriate for use on threads. GLANZA thread seal tape is required to be rolled only four times, where as other seal tapes are rolled twelve times because thread seal tape from GLANZA is three times thicker as compared to other seal tapes

P.T.F.E. THREAD

INSTRUCTIONS

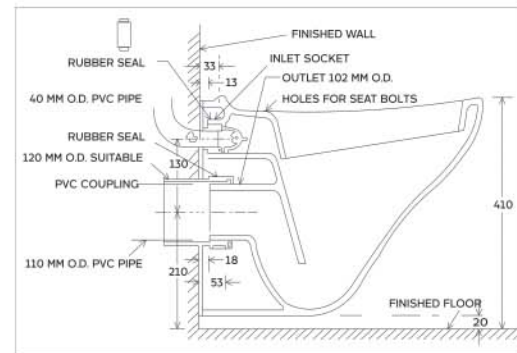

WALL HUNG BASIN

Fixing : the rag should be first grouted into the wall using cement / concrete, (as shown) as per the distance between slots provided in the wash basin. The bolts should be fixed perpendicular to the wall. Allow cement / concrete to set. Check if the Rag bolts are firmly fixed. Fix the Wash Basin in the bolts using Nuts & Washer.

CONCEALED WALL HUNG

1. If the wall is going to be plastered for a thickness of 12 and a tile thickness of 6-7, the projection of the bolts from the finished wall should be 66 only.
2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolt that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface fo the finished floor is 320.

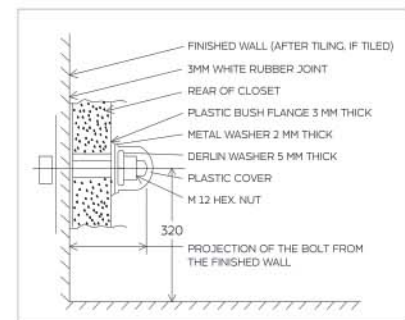

Rubber Seal

Delrin Washer

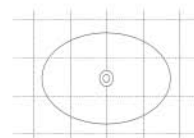

Plastic Bush Flange

COUNTER WASH BASIN

(A) Before You Begin

1. Due to typical nature of the installation, under counter basin should be installed by trained and experienced installers.
2. Inspect the waste and supply tubing if necessary.
3. Install the basin in such a way, that it's removal in future can be done freely and without damage.
4. Prior to installation unpack the new basin and inspect it for damage. Keep the product to its protective carton until it is ready to be installed.
5. Observe all local plumbing an

FOR WOOD COUNTER TOPS

1. Mark and per-drill the wood screw holes at the locations shown on the template.
2. Waterproof any exposed areas of wood.

d building codes.

(B) Tools and Materials

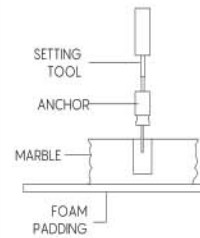

1. Sealant, Pencil, Measure Tape, Sharp knife or scissors, Keyhole or saber saw, Drill (1/2 dia, drill bit or larger) glasses, Haer, Rage or paper toweling.

NOTE: You may require different, more specialized tools to install this basin on counter top materials other than wood or wood components.

(C) Install the Basin

1. Check the desired lavatory location for clearance between the back splash, faucet, fixture and cabinet.
2. Cut out the template.
3. Carefully position and trace the templet on the counter top as directed on the templets.
4. Mark the faucet hole centerline on the counter top.
5. Drill a 1/2" pilot hole on the inside of the cut line.
6. Cut out the counter top opening with a saber or keyhole saw.

NOTE: Install the basin in such a way that it's removal in future can be done freely and without damage.

FOR MARBLE COUNTER TOPS

1. Position the counter top upside down on foam padding to protect the surface. Mark and drill 3/16" holes 5/8" deep at the locations shown on the template.
2. Use a setting tool and haer to secure the anchors.

FOR ALL INSTALLATIONS

1. If the counter top has not been installed, install it as stated below.
2. Drill the faucet holes according to the faucet installation instruction.
3. Install the faucet to the counter top according to the manufacture's instruction.
4. Install the drain to the lavatory according to the manufacture's instruction.
